**PROFILE**

I build new projects just to tickle my brain and love teaching others how they're made. Fully committed to the philosophy of life-long learning, I'm a Business Informatics student with a deep passion for C/C++, HTML, CSS, JavaScript, Python, Java, C# and all things web development. The unique combination of creativity, logic, technology and never running out of new things to discover, drives my excitement and passion for web development. When I'm not at my computer I like to spend my time reading, keeping fit and drinking coffee.
